PROFESSIONAL EXPERIENCE

HAPPY INC. - Senior Front-end Developer

Moscow, Russia

Designed innovative reports for applications on the online survey platform.

06/2022-Present

- Developed 2 reports for the 'Happy Job' app, presenting research data in a new, dynamic format, boosting the company's income by 14%.
- Architected 4 reports for the 'FeedbackX' app, boosting clients' survey data analysis by 20%.
- Advanced and redesigned platform components, improving the UX/UI, which led to a 12% decrease in user complaints.
- Engineered and maintained new features, including advanced data visualization tools that increased data interpretation efficiency by 17%.

AUTODRIVE AGENCY – Front-end Developer

Moscow, Russia

Developed and enhanced e-commerce apps for car dealers and diverse clients.

03/2021-06/2022

- Built 3 online stores from scratch, each with mobile and desktop versions, and developed admin panels for them.
- Employed SEO best practices to enhance the speed and scalability of web apps, resulting in a 10-23% improvement in performance.
- Refactored code in past projects implementing ESLint/Prettier, resulting in 7-15% decrease in project build size.
- Increased the productivity and availability of multiple projects by 10-15% using Google Lighthouse.

SELF-EMPLOYED - Web Developer

Moscow, Russia

Developed and maintained websites for various businesses.

09/2019-03/2021

- Implemented a "mobile-first" approach to new projects, resulting in a 18% increase in development speed.
- Applied modern coding standards and ES6 syntax to create efficient, robust code for various web projects.
- Tested and debugged sites for cross-browser compatibility and responsiveness.
