Nikita Savkin
Frontend Developer

I specialise in creating unique web applications. I strive to create visually compelling, user-friendly applications with high-quality and well-designed code. I'm well-organized person, problem solver and responsible coder.

Experience

Happy Inc. April 2022 - Present | Moscow

Frontend Developer

Worked with applications in a single powerful online survey platform using React and Vue.

- Architected 2 new personal reports for the company's clients, developed and redesigned platform components for compatibility with previous reports
- Engineered and maintained new major features for online survey application
- Developed new functions for the admin panel in order to flexibly configure the online survey application and the report panel
- Interacted productively with the designer, manager and backend developers to improve the quality of the whole system and create the most user friendly interface

Autodrive Agency March 2021 - April 2022 | Moscow

Frontend Developer

Developed e-commerce projects for car dealers and other businesses as a frontend engineer.

- Developed 3 high-quality online stores from scratch using Vue 3, VueX, Vue Router, TailwindCSS with support for mobile and desktop versions of applications
- Implemented admin panels for online stores
- Investigated, evaluated and debugged application issues across time
- Improved the productivity and availability of projects using Google Lighthouse on 15%
- Introduced and enforced a consistent coding style across the applications using ESLint and Prettier
- Eliminated dead code thereby making it more readable for all team

Freelance September 2019 - March 2021 | Moscow

Freelance Web Developer

Developed and maintained code for clients' websites primarily using HTML, CSS (Sass) and JavaScript.

- Implemented a "mobile-first" approach to creating new projects which increased the development speed by 20%
- Manually tested sites in various browsers and mobile devices to ensure cross-browser compatibility and responsiveness
- Wrote modern, performant, and robust code for a diverse array of client
