Education

2019
React - The Complete Guide Course
Maximilian Schwarzmüller

2019
Data Structures and Algorithms
Zero to Mastery

2018
The Complete JavaScript Course
Jonas Schmedtmann

2016
Bachelor of Management
Moscow State University of Mechanical Engineering

Soft skills

- Critical thinking
- Adaptability and flexibility
- Teamwork
- Problem Solving

Nikita Savkin
Frontend Developer

Specialized frontend developer with a proven track record of creating visually compelling and user-friendly web applications using high-quality and well-designed code. Strong organizational skills, problem-solving abilities, and a responsible approach to coding enable me to successfully deliver complex projects.

Experience

Happy Inc.   April 2022 - Present
Frontend Developer

Worked with applications in a powerful online survey platform using React and Vue.

- Developed 3 reports for 'FeedbackX' platform to display research data in a dynamic format
- Architected 2 new personal reports for 'Happy Job' platform, boosting clients ability to analyze and understand survey data
- Developed/redesigned platform components, resulting in a 12% decrease in user complaints and improved UX
- Engineered/maintained major features, including cutting-edge data visualization tools that increased data interpretation efficiency by 17%

Autodrive Agency   March 2021 - April 2022
Frontend Developer

Developed e-commerce projects for car dealers and other businesses as a frontend web developer.

- Built 3 high-quality online stores from scratch using Vue, VueX, Vue Router, and TailwindCSS with mobile and desktop versions
- Implemented admin panels for online stores
- Increased projects productivity and availability by 10-15% using Google Lighthouse
- Eliminated dead code in previous projects and introduced consistent coding style using ESLint and Prettier

Freelance   September 2019 - March 2021
Freelance Web Developer

Developed and maintained websites for clients using primarily HTML, CSS (Sass), and JavaScript.

- Implemented a "mobile-first" approach to new projects, resulting in a 20% increase in development speed
- Adopted modern coding standards and utilized ES6 syntax to write performant and robust code for a diverse range of web projects.
- Manually tested sites for cross-browser compatibility and responsiveness
